

Sitebuilder Access

How do access the Sitebuilder program?

Host 17 Sitebuilder is a Web browser based tool that can help you design a professional looking Website without the Web designer. Start from one of over 300 pre-designed templates, then add your own photos and text by using a word processor-like interface. Then click one button and your site is published. Once published, you can edit and re-publish as often as you'd like. You can even change the template anytime for a completely new looking site.

To login to your Sitebuilder account point your browser to <http://sitebuilder.yourdomain.com/sitelogin.php>.

Once there, enter your Site Identity (i.e. domain without the .com) and your Password (this information is available in your Welcome Letter) and click Login to start.

There are five major steps involved to create your site. Click Next Step to begin and the Wizard will guide you through the process. Help is available at any time by clicking Help in the upper right corner of your browser.
